

We have been grinding over the past months coding for Kupp.app and we are nearing the finish line. Out of all of our goals for Q1, Kupp.app is the top priority. Our Task Center developments are still on track to be launched soon for Foodbuk and Indimi.

We have applied to Etherscan and MyEtherWallt for verification and legitimization. Hopefully we will have a response by the end of the month and we will be able to apply for coin MarketCap.
